Vitalograph Respiratory Monitor Range

For the screening and monitoring of chronic respiratory diseases.

- Proven performance
- Accurate, reliable & robust
- Low cost
- Adult & Child models
- Award winning
- Large display
- Easy to clean flowhead
Vitalograph respiratory monitors range

The Vitalograph range of USB and Bluetooth® enabled respiratory monitors is designed to enable transmission of respiratory data to your e-Diary, telephone, PDA, computer or telemedicine hub, making the home monitoring of those with chronic respiratory diseases, including asthma, cystic fibrosis, COPD and transplant patients, easier than ever.

These devices are ideal for general screening of chronic respiratory disease, in clinical trials and occupational health environments, and provide low cost, accurate and reliable home respiratory monitoring for e-Diary, home hub and telemedicine providers.

Vitalograph asma-1& asma-1 Child

Simple, effective asthma monitoring

The asma-1™ is a robust and cost effective solution for the home monitoring of PEF and/or FEV1. It is fast and simple to use with proven reliability and accuracy in numerous large scale deployments worldwide.

- Electronic record - no need for record cards
- Automatic assessment of test quality
- Provides greater accuracy than a mechanical peak flow meter
- FEV1 less effort dependent
- Child versions measure PEF, FEV1, FEV0.5 and FEV0.75
- Displays % of personal best for both PEF & FEV1
- Stores 600 test sessions

Vitalograph copd-6

For effective COPD screening

The Vitalograph copd-6™ identifies those at risk of COPD at the pre-symptomatic stage to allow early medical intervention and facilitate better clinical outcomes.

This pioneering device screens out those whose FEV1 is normal, and who therefore do not have COPD, without the risk of false COPD negatives.

- Monitors COPD patients using their ‘number’, the obstructive index
  - FEV1 as a percent of predicted
- Displays FEV1, FEV6, ratio and % predicted, obstructive index, COPD classification and lung age
- Built-in quality of blow indicator
- Displays the GOLD COPD classification (stage I – IV) to help recognise the need for a change in the patient’s management plan
Vitalograph lung monitor

For the home monitoring of FEV₁, FEV₆, FEV₁/FEV₆ & FEF₂₅₋₇₅%

The Vitalograph lung monitor provides effective home monitoring of key lung function parameters for those with respiratory conditions including COPD, cystic fibrosis and transplant patients.

- Displays % of personal best FEV₁
- Colour zones indicate the personal best FEV₁
- Stores 200 test sessions
- Automatically assesses test quality
- Quality of blow indicator
- Easy to clean mouthpiece and flowhead

Vitalograph reports

Easy to use report generation software produces high quality reports for printing and storing based on patient demographics.

Consumables

Can be used with hygienic SafeTway® mouthpieces or bacterial a viral filters (BVF™)

Developers’ Kit

A Developers’ Kit is available for providers of e-Diary, home hubs and telemedicine solutions.

All Vitalograph USB and Bluetooth devices satisfy relevant international standards - reference Technical Specification for details.
Technical Specification:

Product: Respiratory Monitor
Model Number: 4000

Parameters Displayed can include (depending on variant): PEF, FEV₁, FEV₆, FEV₁ / FEV₆ ratio and FEF₂⁵-₇⁵

Memory can include (depending on variant): PEF, FEV₁, FEV₆, FEV₁ / FEV₆ ratio and FEF₂⁵-₇⁵

Quality of Blow Indicator: Yes
Accuracy: better than +/- 3%
Range: 0 - 9.99 L BTPS

Sensor: Stator rotor
Flow Impedance: Better than 0.15 kPa/L/s at 14 L/s
Power Supply: AAA batteries
Display: Custom liquid crystal display
Size: 113 x 63 x 48mm
Weight: 55g

Safety Standards: IEC 60601-1:2005

Designed & Manufactured Under:

Respiratory Monitors Supplied With:
Supplied with Vitalograph Reports, Bluetooth Dongle and Driver CD, License Agreement (please refer to Vitalograph Respiratory Monitors Developers’ Kit brochure for choice
