CSCE 190 - Computing in the Modern World
Credit Hours: 1 hour
Contact Hours: 1 lecture hour
Instructor: Dr. Marco Valtorta

Required Textbooks: none
Bulletin Description: An introduction to the field of computing: trends in computing technology, the profession, and careers; subdisciplines in computing; the nature of research and development.
Prerequisite or Corequisite: CSCE 145, 204, 205, 206 or equivalent

Required Course in CE, CIS, and CS programs
Learning Outcomes: Students will be able to:
1. Describe “the big picture” of computing,
2. Identify important milestone events in the history of computing,
3. Identify some advanced directions in computing research,
4. Describe career trends and career options in computing.

Student (Program) Outcomes addressed by course (Detailed mappings available)

Topics covered:
1. The curricula in computing at USC (1 hour)
2. The job market and employment trends in computing and IT (1 hour)
3. Trends in computing—hardware, devices, HCI, software, and the web (5 hours)
4. Research methodology in computing (1 hour)
5. Research topics in computing at USC (2 hours)
6. Lectures from the real world (3 hours)
