CSCE 210 - Computer Hardware Foundations
Credit Hours: 3 hours
Contact Hours: 3 lecture hours
Instructor: Dr. Matt Thatcher

Bulletin Description: Number representation, data formats, CPU and memory organization, assembly language, I/O and peripherals, computer networks.

Prerequisites: CSCE 145, 204, 205, 206, or 207

Required Course in CIS programs

Learning Outcomes: Students will be able to:
1. Describe the major storage formats for data,
2. Represent integers, floating point numbers, and character data,
3. Describe the major components of a computer system and state their functions and purpose,
4. Explain how conventional machine instructions operate in conjunction with the components of a computer,
5. Demonstrate the ability to program in assembly language,
6. Explain the fundamental concepts and implementation options for input and output.

Student (Program) Outcomes addressed by course (Detailed mappings of these course outcomes to the Student Outcomes of the programs are in the detailed syllabus and the Assessment plan.)

Topics covered and approximate weight:

1. Data representation (9 hours)
2. Computer organization (3 hours)
3. Assembly language (9 hours)
4. I/O and peripherals (6 hours)
5. Memory hierarchy (3 hours)
6. Distributed systems (3 hours)
7. System examples (5 hours)
8. Reviews, examinations, etc. (4 hours)
