Datanova Scientific is a young and innovative company that specializes in big data, cloud technology, natural language processing (NLP), machine learning, semantic technology, and artificial intelligence (AI). We aim to advance the core state of big-data science. The company culture focuses on high ethical standards, mentorship, flat organizational structure, and a supportive, apolitical work environment.

We are looking for an app development and visualization intern to help us visualize sophisticated information data quickly and easily.

The tasks for this position may include:
1. Working with Facebook and Twitter APIs
2. Working with cutting edge Datanova tools
3. Thinking of creative visualizations
4. Creating and optimizing a Facebook app
5. Creating and optimizing web visualization
6. Programming and testing
7. Additional duties and responsibilities may apply

Your work during this internship may be featured in our products.

The requirements for this position include:
1. A bachelor’s degree, **OR** current enrollment, in a relevant degree program
2. An avid interest in technology
3. JavaScript proficiency
4. Java familiarity
5. A strong work ethic
6. Professional demeanor
7. Aesthetic sensibility

Please apply with your resume and cover letter at careers@datanovasci.com.
