

types.h :

TYPE ty-build-basic(TY_SIGNED_LONGINT)
type tag

TYPE ty-build_ptr(---)

TYPE ty-build_array (. . -)
↑ ↑
index element
type type

call these as you parse a type
denoter

syntab.h

st_init_syntab()

ST_ID st_enter_id(char *)
"enrolls" the id into the
symbol table

st_install(ST_DR)

st_lookup()

↙ "installs" an id in the
symbol table

To install:

get new ST_DR

(call st_stdrr_alloc())

fill in the fields yourself

then call
