

---

*csce350 — Data Structures and Algorithms*  
*Fall 2019 — Opportunity to Un-submit Project 2*

---

For Project 2, a small number of submissions were not completed independently.

- No differences at all.
- Differences only in variable names, indentation, comments, etc.
- Copying between students.
- Copying from web sources.

**Reminder from syllabus:** *Assignments should be done independently. It is permissible to discuss the problems at a high level with your classmates, but you should work out the details and compose the complete answers independently. Submission of identical or substantially identical work will be considered strong evidence that cheating has occurred.*

*The academic penalty for cheating is a failing grade for the course.*

If you submitted work that was not your own for Project 2, you may **unsubmit** your project, with no questions asked and no additional penalty, until **10am on Thursday, November 14** by sending me a one-sentence email.
