
CSCE574 – Robotics
Spring 2014 – Homework 12

Assigned: April 17

Due: April 22

name

Create at least one diagram or illustration that, in your opinion, was “missing” from the lecture notes this semester. Your goal should be demonstrate your understanding of the content of the class by illustrating one of the ideas we learned to future students. Be sure to tell me where (What location, in which notes?) your new diagram belongs.

If you use a computer to create your diagram, you may submit this assignment by sending an email attachment in some standard (preferably vector) graphics format. Otherwise, a careful drawing on paper will suffice. In either case, be sure to produce something of high enough quality that it could be used a lecture-style presentation.
