## CSCE574 – Robotics Spring 2014 – Homework 15

---

**Assigned:** April 17

**Due:** April 24

---

name

Suggest five specific, substantive improvements to the “Notes on \_\_\_\_\_” documents we’ve used in this course, or to the textbook, *A Gentle Introduction to ROS*.

Your goal should be demonstrate your understanding of ROS and the Turtlebot robots—both as the documentation claims, and as they really turn out to work—by helping to make these documents more useful for students in future versions of this course.

- Your suggestions might be clarifications, corrections, expansions of existing sections, additional paragraphs, tips, tricks, or other changes.
- Your suggestions should be *specific*.
  - **Don’t** write something like “Have a sentence about XYZ.”
  - Instead, *write that sentence* and tell me where it should go.

You may submit a marked-up copy of the original notes, use a separate sheet, or both.
