

Submission Instructions for Project 2b

Your submission will be through the departmental dropbox.

Your code should be submitted as a gzipped or zipped tar archive, as described in the “Submission” section of the Lab 2 description at

<http://www.cse.chalmers.se/edu/year/2018/course/DAT151/laborations/lab2/lab2.html>. (Of course, you will submit through dropbox, not through “Fire” as indicated on the cited website.) Please run the test suite as described at

<http://www.cse.chalmers.se/edu/year/2018/course/DAT151/laborations/lab2/testsuite/index.html> before submitting.

In addition to the code, you must include in your submission a readme file, which must include either (1) a description of the changes that you had to do with respect to the code in [R], or (2) a narrative description of the most challenging parts of this project, or (3) a listing of the call sequence of functions in the typechecker on one good program and one bad program.
