CSCE 531   Spring 2020   Project 1 (part a)

Install BNFC on your computer.

Follow the steps described in sections 2.1 and 2.2 [R] and verify that you obtain the files described there, for both Haskell and Java.

Submit a single pdf document with a script or screenshot showing the files in your directory of folder. (One makefile will be renamed by BNCF; that is fine.)

This is due on Tuesday, February 11, 2020.
