

CSCE 531 Spring 2020 Project 1 (part b)

Implement a calculator in Haskell as described in Section 2.6 [R].

Implement a calculator in Java as described in Section 2.7 [R]. Please use BNFC and Java under Ubuntu for this. If needed, install VMWare Workstation Player; the free version at <https://www.vmware.com/products/workstation-player/workstation-player-evaluation.html> is enough.

Submit two pdf documents (one for Haskell, one for Java) with scripts or screenshots showing the files in your directory of folder and the result of running the command line input and, for Java, also the file input, in sections 2.6 and 2.7.

This is due on Thursday, February 20, 2020.
