

CSCE 580 Spring 2017
QUIZ 2
Assigned Thursday, 17-01-24

1. The sociologist Massimo Negrotti, on the basis of a survey he conducted at the International Joint Conference on Artificial Intelligence in Karlsruhe, 1983 (IJCAI-83), identified three definitions of artificial intelligence. You are asked to match the definitions of artificial intelligence that professor Negrotti identified to their names.

Match:

- (a) Attempt to build machines that simulate human intelligent behavior
- (b) Attempt to simulate human intelligent behavior by means of computers
- (c) Attempt to model human intelligent processes by means of programs

to:

- (a) Cognitive definition of artificial intelligence
- (b) Robotic definition of artificial intelligence
- (c) Behavioristic definition of artificial intelligence

Answer: 1-2, 2-3, 3-1

2. The Turing test is a behavioral test. True or false?

Answer: True
